

## Identifikatsiya modeley samoletov v usloviyakh strukturnoy nepolnoty: Monografiya (Russian Edition)

Monografiya posvyashchena probleme povysheniya tochnosti parametricheskoy identifikatsii matematicheskikh modeley samoletov po dannym letnogo eksperimenta v usloviyakh strukturnoy nepolnoty, to est pri strukturnykh otlichnykh prinyatoy modeli ot realnogo obekta. Opredeleny osnovnye strukturnye istochniki pogreshnostey identifikatsii aerodinamicheskikh koeffitsientov i polucheny kolichestvennye otsenki etikh pogreshnostey. Minimizatsiyu pogreshnostey identifikatsii predlagaetsya osushchestvlyat na osnove sinteza spetsialno подобрannykh testovykh signalov. Pri etom ispolzuetsya dopushchenie, chto velichina strukturnoy pogreshnosti neizvestna, no imeetsya informatsiya o ee tipe. V ramkakh provedennykh issledovaniy razrabotan metod sinteza upravlyayushchego signala, obespechivayushchego zhelaemyy vykhodnoy signal. Razrabotana metodika nakhozheniya oblasti znacheniy parametrov upravlyayushchego signala, minimiziruyushchego pogreshnost identifikatsii. Provedena aprobatsiya razrabotannykh metodov i otsenivanie ikh svoystv metodami matematicheskogo modelirovaniya.
