

New Forms and Technologies of Traditional Chinese Medicine (Chinese Edition)

This book is a monograph on the new forms and technologies of traditional Chinese medicine. In the book, the author summarizes the latest researches on Chinese herb manufacturing and years of researching experience from the aspects of extracting methods, preparation techniques and shape techniques. Also the book concentrates on the highest level of domestic researches on traditional Chinese medicine manufacturing and foreign research development. At the same time, besides explaining the theory and principle with simple language, the book pays close attention to the practical problems in the research, production and application process, such as the problems of the development of traditional Chinese medicine injection technology and the new safety problems of traditional Chinese medicine preparation. Moreover, the book puts forward the technical solutions and ideas from the manufacturing level, so that the safer, more effective, convenient and stable traditional Chinese medicine can be developed.
