

Reviews on Analytical Chemistry: Euroanalysis VIII (Special Publications)

Reviews on Analytical Chemistry presents brief, up to date overviews of developments in analytical chemistry. It is written by internationally renowned experts, who explain the contribution made by their research groups to this subject area. Reviews on Analytical Chemistry covers a unique combination of important subjects, with particular scrutiny given to developments in environmental and biomedical analyses, and sensors. The book also discusses in detail the principles of proving the validity of an analysis and the accuracy of the results achieved. Reviews on Analytical Chemistry provides an invaluable and interesting survey of many relevant topics within analytical science. It will be of use to graduates, teachers and researchers in analytical, environmental (notably pollution) and biological science, as well as medicinal and pharmaceutical chemists.
